Our ability to provide high-quality products at a great value has led us to sell to varied institutions, including government bodies. These institutions are often required to adhere to the Buy American Act of 1933, the Buy American Provision under the American Recovery and Reinvestment Act of 2009 (ARRA), and the Build America Buy America Act (BABA). eGauge Systems ensures our customers that our products can be purchased in compliance with these acts, as they are manufactured in the United States, thus satisfying the conditions to have the component test waived by these acts.

We also sell products to many contractors for projects funded by federal or state grants, including infrastructure projects for various government agencies. Most of these projects must adhere to the FTA's Buy America Requirements set forth in 49 U.S.C. § 5323(j). Our meter is exempted by the permanent waiver for microcomputer equipment and software used solely for the purpose of processing or storing data, as stated in Appendix A of 49 CFR section 661.7, App. A, para. (b)).

We hope that the information provided here is helpful to all of our customers who must adhere to these regulatory requirements.

Sincerely,

Robert Cowan
CEO
